

Kindness Animal Hospital

1902 Hallie Rd ~ Chippewa Falls, WI ~ 715-834-9201

Dr. Charles Arntson

Surgical Release & Pre-Anesthetic Consent Form

Client _____ Patient _____ Date _____

PROCEDURE (S) _____

I am the owner or owner's agent of the animal described above and I understand that I am authorizing performance of the above named procedure(s) which has been explained to me and I understand what will be done.

I understand the sedatives and anesthesia used may rarely result in patient death. Possible complications of the procedure(s) have been discussed and these include infection and breakdown of the incision. I understand that the success of the procedure(s) is dependent on many factors and a guarantee of a successful outcome is neither implied nor expressed.

I have received an estimate and understand that this is only an estimate of charges based on the initial assessment of the patient's problem(s) and that the final charges may vary from the ranges estimated. As the owner or authorized agent I hereby authorize treatment(s) as discussed and any emergency treatment that may be necessary. I will be responsible for all charges incurred during treatment. All charges are due and payable at the time of patient discharge. If payment is not made, I will be responsible for payment of all costs involved in collection of charges including all court costs and attorney fees.

If I neglect to pick up my pet **within 5 days** of the above date and do not notify you within that time period, you may assume that the pet is abandoned and are hereby authorized to dispose of the pet, as you deem best or necessary.

Kindness Animal Hospital is not staffed 24 hours per day.

Signature _____ Date _____

Any anesthetic carries some risk. The more information we have the safer the anesthesia procedure will be. We recommend a pre-anesthesia blood chemistry panel on all pets prior to anesthesia. Most anesthetic drugs are removed from the body by the liver and kidneys; therefore it is important that these organs are healthy. It is also important that patients have normal blood counts to promote proper tissue healing. Even if all the tests are normal, it does not guarantee that your pet will not have an anesthetic reaction, but it does tell us that your pet is healthy and in a low risk category.

Profile 1 - **Healthy patients under 8 years of age** - Cost: \$87.50 I select Profile 1

Profile 2 - **Geriatric (over 8 years) or sick patients** - Cost: \$160.00 I select Profile 2
